

4 Reading Worksheet

1. Read the article. According to the article, what color clothes do neat people like?

What color is your personality?

Some psychologists believe that the colors of our clothes say a lot about our personalities and that's why some of us prefer to wear certain colors.

Is red your favorite color? Then you're probably an optimist and an extrovert, and you're very brave. You also enjoy getting plenty of exercise, and when you're doing sports you always want to win!

Have you ever worn an orange T-shirt, orange pants, or orange sneakers? That's probably because you're an extrovert. You love socializing, and you're the talkative person at a party. You're adventurous and brave too, and you like a challenge.

If yellow is the color you always choose, that's because you're a neat person. You're also very creative and enjoy designing and creating things. You love solving puzzles and playing games, too.

If you've never worn green clothes, it's because you aren't shy or serious. Wearing green means you're sometimes nervous, but you love joining clubs and being involved in activities.

Do you often wear blue clothes? You're a brave person and you don't like changing your mind about things. You're a calm person, too. Your friends know this, and they enjoy being with you.

Calm people also like to wear gray. If you wear a lot of gray, sometimes people think you're a pessimist, but you're not. You enjoy working hard, and you can be a little serious at times.

So, what are you wearing today and is it telling the truth about *your* personality?

2. Scan for information Choose the correct answers.

- Wearing red clothes can mean a person ...
 - is very cautious.
 - isn't a pessimist or an introvert.
 - always loses in sports competitions.
